

MO, 08-1

LICENSE HISTORY

07/16/93

MO.8 Petrolite Corporation, St. Louis

- See attached Document and File Summary for MO.8
- **License History:**
 - 24-10452-01, 30-051175, 08/13/79. Loose H-3, I-131, P-32.
 - 24-10452-1, 10/30/64. K66 R. R. Annand et al Multiple.
 - 70-621, 12-15-61, SNM license for 0.5 kg. of U-235, 93% enriched as a fuel loading and start-up source for Webster Groves, Missouri reactor.
- **Discussion:**

Historical documents for this site are limited. The only information available on work done under NLO subcontract is that it involved test quantities of material other than metal. The license history also indicates that only test quantities of radioactive material was used at Petrolite Corp. Because it appears that test quantities of material were used at Petrolite, based on license records and a description in a memorandum from 1986 (Current Document, 07/28/86), and because it appears that test quantities of material were licensed by NRC, it is recommended that this site be eliminated from consideration under FUSRAP.
- **Copies from File:**
 - Current Document, 07/28/86.
 - NRC license record index.
